DETAILED ACTION

This Office Action is in response to the Election filed May 30, 2007 for the above identified patent application.

Election/Restrictions

1. Applicant's election without traverse of Group I in the reply filed on May 30, 2006 is acknowledged.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Watt (USP 4,902,162).

Watt illustrates in figure 8 a resin gear (column 3, lines 19-24) comprising: a rim having teeth on an outer periphery thereof; a hub for receiving therein a driving shaft, one end portion of the hub having a key receiving portion (12) for engaging a key (6) of

the driving shaft; and a web extending in radial directions to connect said rim to said hub, wherein said key receiving portion has a side wall for preventing relative rotation of the key to the hub, and a bottom wall for allowing the key and the hub from being positioned in directions parallel to the driving shaft, and a portion of said web surrounding the hub and key receiving portion is arranged so as to be shifted from the bottom wall of the key receiving portion toward a contact portion in which the key contacts the side wall of the key receiving portion.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the gear mounting arrangement of Harwath ('939), Crawford ('831) and German reference 26 11 882.
